

# Solar Sipper® Water Stations

## Deluxe Solar Sipper - 10008

The Solar Sipper® Deluxe is the best product for clean, fresh drinking water for wild birds on the market today. This water station does it all. Unlike a birdbath, it covers the water to keep it clean. The patented design insulates to keep water cooler in the summer and warmer in winter. It heats with a unique solar design against winter ice. In winter simply fill with warm water, place in winter sun and the Solar Sipper will remain unfrozen all day to **20 degrees F**.

Wild bird Deluxe Solar Sipper® includes berry red footed base and solar black top. 8-1/2" dia., 3" H. 1-1/2" dia. opening. Holds 1 quart.

## Pet Solar Sipper - 10012

Safe and reliable Solar Sipper® animal watering stations are engineered for providing fresh drinking water. The water surface is covered to keep water clean while the unit is insulated for year-round use. Winter use is possible due to the patented solar top. In winter, simply fill with warm water, put out in the winter sun and the unit will remain unfrozen all day to **20 degrees F**.

Solar Sipper® small animal water station - a little fancier for the cat or dog who has everything. Berry red base, translucent top. 8-1/2" dia., 3" h, opening 4" dia. Holds 1 quart (Model 10011 features black outer cup).

## Super Solar Sipper - 10040

The Model 10040 Super Solar Sipper® solar-heated portable fresh drinking water station for wild birds is designed with birds in mind to go where they go at any time of year. Tough plastic cover keeps water clean for a day's drinking while the patented top design keeps enough solar heat to keep water from freezing to **15 degrees F**. all day in winter sun, depending on sun and wind conditions.

8-1/2" dia., 3" H. 1-1/2" dia. opening. Holds 1 quart.

## Mounting Bracket - 10004

The Solar Sipper® Bracket fits the standard and deluxe Solar Sipper. Mounting hardware included.

(Shown with optional Solar Sipper® Standard (Model 10007) and Solar Sipper® Deluxe Water Stations (Model 10008))
